

## **AMENDMENTS TO THE SPECIFICATION**

Please further amend paragraph [0051] of the published application as follows:

- - Another embodiment of the present invention provides a molecule comprising V<sub>H</sub> and V<sub>L</sub> domains of amino acid sequences having SEQ ID NO: 104 and ~~[[103]]~~93, which has specific affinity for FGFR1 and which blocks ligand-dependent activation of FGFR1, and the corresponding isolated nucleic acid molecules comprising polynucleotide sequences having SEQ ID NO: 75 and SEQ ID NO: 66. - -
